DETAILED ACTION

The amendment filed on 5/31/2005 has been entered. Claims 1-6, 21, and newly added claims 22-34 remain for examination.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, and 21-27, drawn to the specifics of a mobile terminal such as bar code reader, insert molded component, etc., classified in class 235, subclass 462.45.
- II. Claims 28-34, drawn to the specifics of a molding technique, classified in class 235, subclass 488.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process for making the insert-molded antenna can be used for insert-molding other electronic components such as the IC chip, the specific circuit or controller, etc. Further, the mobile terminal as recited in invention Group I does not necessarily requiring the specifics of the insert-molding technique as recited in Group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
